## Summary

This design proposal is for 2nd Floor Conference Room 222G at Texas A&M's College Station, TX location. The existing interactive front display will be removed and replaced with a new non-interactive wall mounted large format display on articulating mount. The existing display wall mounted at the rear of the room will be removed. Sources will include a new HDMI user connection, to be located in the center table cubby, as well as the existing Static PC. These sources will be set to auto-switched based on priority. A new wall mounted auto-framing PTZ camera will be installed at the new front display location for participant video capture. (2) New ceiling mounted microphones will be installed and utilized for participant audio capture. (4) New ceiling speakers will be installed for local audio playback. The camera, microphones, and speakers will be available for use with the Static PC, as well as a new USB table connection. The USB table connection is for peripheral connection only. The HDMI will still need to be utilized for local video to be presented on the in-room displays. The USB peripherals will auto-switch, similar to the HDMI, based on priority. A new wall mounted button pad will be installed for basic room controls including system on/off and volume control. No source selection, camera control, or independent audio control is provided. All head end AV equipment will be installed behind the new display.

***\*\*\*All removed equipment no longer pertaining to this design will be left with the site contact to do with what they see fit\*\*\****

## Key Components

- Samsung 98" UHD Display on new Articulating Mount
- Customer provided Static PC as a Source
- HDMI/USB Tabletop User Connections
- Aver Cam550 Dual Lens PTZ Camera with Auto-Framing
- Biamp Audio System Including (1) DSP, (2) Microphones, and (4) Speakers
- Crestron MPC Wall Mounted Button Controller
- Custom Programming with 30 Day Test Drive
- 1 Year of FREE Blue Ribbon Support
- Project Management and As-Built Line Drawings
- Custom Installation and Complete Training

---

## Client Requirements

---

### POWER

(1) 15A Duplex at the display location

### LAN

(1) Network Connections at the display location (Static PC)

### WALL REINFORCEMENT

YES – At the display location

### CABLE CONVEYANCE

Pathway required from under table to accessible ceiling within the room.

Continuous conduit is required for all cable conveyance running through inaccessible areas (i.e. hard ceilings, drywall, etc.).

Conduit may be substituted with 'ring and string' in all accessible areas (i.e. acoustic drop ceiling).

- Customer Requirements

- Please note that all LAN, Phone and Power recommendations made by TTI will be in reference to the Audio/Visual and Integrated Conferencing equipment ONLY. Any additional LAN or Phone needs required for room use will not be included in this Statement of Work. All applicable requirements MUST be complete prior to TTI's arrival. ANY requirements not met prior to arrival may result in rescheduling and or additional charges.

- Payment Terms

- NEW Customers or for Orders greater than \$25k; 25% due on issuance of PO, 50% due upon equipment delivery, remaining balance due upon project completion.
- Orders less than \$25k-NET30 from equipment delivery.
- Customer is responsible for any and all state or local taxes or duties.
- Any item desiring to be returned must be done within 15 days of receipt. All returns items are subject to a restocking fee.
- Taurus will arrange proper shipment and bill accordingly for shipping and handling.
- Invoices are issued and payable in US Dollars directly to Taurus Technologies Incorporated.

- Owner Furnished Equipment (a.k.a - 'OFE')

- IF any Owner Furnished Equipment (OFE) shall be utilized in this design it will be presumed for the purpose of this Scope of Work and price quotation that all OFE is in good and proper working order.
- No provisions have been made in this price quotation to test, troubleshoot or repair any Owner Furnished Equipment.
- Should any testing, troubleshooting or repair be required to bring the Customer's equipment back to good and proper working order, additional charges may apply.
- The appropriate Taurus Technologies and customer representatives shall agree on services to be rendered and price for such prior to any services being rendered by Taurus Technologies.
- If the customer is providing any type of source code or configuration files for new or existing equipment, for Taurus to amend and implement, those files must be in complete and proper working order. Any unforeseen issues with said files, that cause additional time outside of this scope of work, may come with additional charges.

- Project Specifics

- i. Client Responsibilities

- Any functionality features or equipment not included in this Scope of Work must be addressed in writing prior to acceptance and authorization of this project.
- A clean and secure work area and that provides conditions that are not detrimental to the equipment provided or personnel on site.
- **\*\*\* All required spaces (rooms, access points, etc.) must be available at the start of the installation and remain available for the duration of the project. Any required space that is unavailable during the scheduled installation timeframe may result in delayed delivery of the project and possible additional charges.**
- Uninterrupted access to work area during normal business hours in the local time zone (8AM-6PM). Afterhours access will be arranged when needed.
- All Owner Furnished equipment must be in proper working order and accessible at the beginning of the project.
- All shipments directly received by the client must be inspected for physical damage and any issues MUST be reported within 24 hours. Any damage not reported within the 24-hour delivery window will be the sole responsibility of the client.
- It is understood that the Customer takes possession of product from TTI shipping point regardless of which party pays for freight. Upon acceptance, in good order, by carrier from TTI, the material becomes the property of the consignee. All claims for damage, breakage or losses (concealed or obvious) must be made by the consignee, to the carrier in accordance with ICC regulations. (ship to information contained in section I.a and I.b)
- Installation and testing of all LAN, Phone, and Power circuits prior to arrival on site.
- "Hard Point" for mounting of equipment. TTI will provide equipment specific mounting hardware to be attached to structural support provided by the customer.
  1. When in doubt, the Customer should contact a certified structural engineer.

- Ceiling Recessed Projection Screen: TTI shall mount and level projection screen(s) within the ceiling grid. Customer is responsible for repairs and/or replacement of any ceiling materials modified or damaged during the screen installation. Client shall be responsible for providing proper power circuit at screen location and connection of the screen control unit to the circuit.
- Pathway for AV cabling to include any core drilling or structural modifications.
- All conduit and raceway as required per local code.
- Proper ventilation at all rack locations.
- Any changes to the scope or functionality of the proposed design and subsequent signature of the Statement of Work will result in additional costs to include, but not limited to, equipment cost, shipping cost, travel expenses, programming charges, and labor expenses.
- Custom millwork, construction, or trim required to complete the project.
- Suitable area for receipt/delivery of equipment. Any inside delivery charges will be the responsibility of the client (noted in section I.c)
- **Any project installation scheduling requires a purchase order at least 2 weeks in advance to the desired date(s).**
- **Prior to installation, all end user locations will be sent a Certificate of Insurance at the place of install. Should the customer/leasing company/owner request additionally insured certificates of more than (1) listed on the C.O.I. Texas Legislation Senate Bill 425 will only allow (1) listed owner on the Certificate of Insurance and not multiple entities. Any deviations from this policy will require the End User to request each owner/entity additional information of business name and location for underwriting purposes, which could incur additional fees.**
- Intellectual Property
  - Control Code – Programming and Touch Panel Files
    - a. All control code and intellectual property related to the control code becomes the property of the client after all invoices have been paid in full. A copy of this code will be maintained by Taurus Technologies in order to easily and efficiently make changes as requested by the customer.
    - b. A touch panel “test drive” is allowed for the first thirty (30) days after which one (1) minor touch panel revision will be made at no cost to the client. Minor changes will include “look and feel” of panel as well as small functional needs that may have changed after the room has been in use but that do NOT deviate from the Scope of Work. All touch panel changes will be made at the end of the 30-day period unless customer requests otherwise. If the customer does request the changes to be made before the 30-day period is up the remaining days will be forfeited and no additional amendments will be made. All deviations from the Scope of Work or that require cabling changes or equipment moves will be billed as a change order.
  - Line/Schematic Drawings, and Flow Drawings
    - a. All drawings become the property of the client after all invoices are paid in full.
  - Warranties – All manufacturer warranties apply. These warranties and ownership thereof will be the customers. Optional upgrade warranties may be purchased upon request as well as Taurus Remote and On-site support packages.
