Sole Source and/or Proprietary Justification

Requisition No. R700045 Date: 1/9/2017

This form is to be used to aid departmental staff in relating information necessary in the process of requisitions on a sole source and/or proprietary basis. Your cooperation in answering the questions listed below will assist the purchaser in handling your order expeditiously. Please complete the form and forward to HUB and Procurement Services. If more space is required, feel free to attach additional pages. **NOTE: For your convenience, this is a fill-in form. Adobe Reader required.**

1. Description of item (if commodity: make, model no., etc.; if service: detail of type of service):
   Hydropac watering system including: Hydropac AWS-2500 Pouch Machine, film, filtration systems, pouch patches, warranty, preventive maintenance, delivery & setup, plus Hydropac pouch holders w/SPC & SPCL Adapters for ACS Opti Mouse and Rat cages, respectively.

2. Name of known source for item:
   
   Lab Products, Inc.

3. What feature or functions are unique (proprietary) to this item?
   
   Hydropac/Lab Products Inc., designs, engineers and manufacturers its proprietary products for biomedical research facilities and does not use distributors. All items quoted are proprietary products manufactured and marketed solely by Hydropac/Lab Products, per vendor.

4. Briefly explain how the unique features or functions are essential to the purpose for which the item is needed.
   
   Compatibility with PAR ACS Opti Mouse and Rat cages is imperative. Storage capability for an emergency water supply is crucial. The requested system's patented, sterile disposable delivery valve is stated to reduce the potential for cross-contamination & its filtration system to reduce the risk of microbes. Its versatility and production rate make it more efficient.

5. List any source other than the known source that manufactures or supplies similar items or items with similar functions.
   
   None.
6. Why are the other sources not satisfactory?
   No other system was found to have all the features of the system requested.

7. Will the item be used with existing equipment?  
   If yes,  -as a repair/replacement part?  
   -as component to be interfaced?  
   -as an accessory?  
   -to match existing equipment?  
   -for reason of interchangeability?  

   List make and model of existing equipment.
   ACS OPTI Mouse and Rat Cages

8. Include any additional information that may aid the purchaser in processing this requisition.
   Re-renewed quotes QTE16-00383-2 and QTE16-00384-2 dated 12/16/2016 valid through 1/15/2017, vendor letter, and HSC email notification of available funding for this specific purpose are included with this submission.

I certify that, to the best of my knowledge, the above information is true and accurate and that no other material fact or consideration offered or given has influenced this recommendation for a sole source/proprietary purchase.

Submitted by:  Mary Cole, Administrative Associate V, IBT-PAR

(Printed name, title and department)

Signature:  [Signature]
The watering system used for the animal facility at Texas A&M IBT needs to be replaced. The current system has two components that are beginning to fail.

One component is the polycarbonate water bottles. These bottles were part of the original purchase of cages over 10 years ago. Cracks are forming in the plastic and leaks are more commonly seen. They have reached their expected service life and should be replaced. If more bottles leak, then others can be brought from inventory. It should be noted that these polycarbonate water bottles have a risk of leaching out BPA from the plastics. A new type of water holding device should be purchased.

The other component is the water acidifier. This machine is even older than the caging system. It has reached and surpassed its expected service life and should be replaced. The frame and other mechanical components of the acidifier are corroding and going to fail soon. This will be a catastrophic failure. Currently, a replacement acidified watering system or redundant watering system is not available. In the event of the failure of this system, untreated city water will need to be supplied to the rodents in the animal facility. The use of untreated water in animal water bottles quickly becomes contaminated with bacteria. This will complicate research efforts.

Proposed solution: A new high volume water acidifier should be purchased. A system has been identified by Phil Shirley after the evaluation of several different systems. The new system includes the use of water bags. These bags are disposable and as an added advantage, water can be stored in the bags for up to one year. A separate lid or hanging water bag device will need to be added to the caging system. Phil has also identified the most advantageous system for PAR.

This acidifier has been identified on previous semiannual inspections, but funding has not been secured for the replacement. The funding of this project, in my opinion, has reached a critical time frame and should be funded as soon as possible.

**HERE IS OUR QUOTATION ON THE GOODS NAMED, SUBJECT TO THE CONDITIONS NOTED**

The Prices and terms on this quotation are not subject to verbal changes or other agreements unless approved in writing by the Home Office of the Seller. All quotations and agreements are contingent upon strikes, accidents, fires, availability of materials and all other causes beyond our control. Prices are based on costs and conditions existing on date of quotation and are subject to change by the seller before final acceptance. Typographical and stenographical errors subject to correction. Purchaser agrees to accept either overage or shortage not in excess of ten percent to be charged pro-rata. Purchaser assumes liability for patent and copyright infringement when goods are made to Purchaser's specifications. When quotation specifies material to be furnished by the purchaser, ample allowance must be made for reasonable spoilage & material must be of suitable quality to facilitate efficient production. Conditions not specifically stated herein shall be governed by established trade customs.

Terms inconsistent with those stated herein which may appear on Purchaser's formal order will not be binding on the Seller.

A 10% HANDLING CHARGE WILL BE ADDED TO ALL PREPAID FREIGHT CHARGES.

Dear Ms. Cole:

Hydropac/Lab Products, Inc. is a small business that manufactures and sells its products directly to Biomedical Research facilities. We do not use distributors for our products. Hydropac animal watering systems are designed, engineered and manufactured in our own manufacturing facilities.

In reference to our quotations #QTE16-00383-2 and QTE16-00384-2 dated 12/16/2016, all items quoted are proprietary products manufactured and marketed solely by Hydropac/Lab Products. Please accept this letter as verification.

Should you require any additional information, please contact us.

Sincerely,

LAB PRODUCTS, INC.

Kellie, I had worked with Neraaj on this a while back. Please advise if you need my assistance.

Thanks!
Mark

Howdy!

Funding for the IBT Watering System has been transferred to account 23-215007 from the HSC. It is ready to be used for the requisition/PO.

Will the $300,787 be the total cost? I didn't actually get a copy of the quotes. If someone has those, please forward copies to me.

Thank you!
Jeff

Hello Phil - please submit the quotes for a requisition/PO. For a high dollar purchase such as this, additional processes, approvals and paperwork are needed.

If you need Mark Cervenka's assistance, please don't hesitate to contact him.

Funding source: account 23-215007
Funding total: $300,787

This is very exciting to begin the process to purchase our new, much needed, watering system.

Best.
KK

I would contact the sales rep who issued the quotes and get written confirmation from them that the quotes are still good beyond 12/25. Is this something you will do or do need me to do that?

Hi Mark, attached are the two quotes needed for the watering system. Please note: both renewed quotes are currently good through December 25; do we need to ask for an additional extension?

QTE16-00383-1 for the system itself, along w/maintenance, delivery, set up, training - $133,909
QTE16-00384-1 for the pouch holder adaptors - $166,878.20

Please let me know what else I need to do on this.

Thank you,
Mary

Hi Susan and Robby, attached is information to request the purchase of a new watering system for PAR. FAMIS doc R700045.

I did not mark it as an emergency, per se, but it has been an increasingly important need, which now must be addressed as an animal welfare safety measure, as indicated in the funding request submitted to the TAMU VPR (attached). Funding has been appropriated as indicated in the attached Rdoc compilation.

Please expedite, if possible, as it will take additional time for the vendor to prepare the system in order to fill the order. Please let me know if anything else is needed. Thank you for your assistance! Mary
