ATMOSPHERE CONTROLLED HYBRID CNC - SYSTEM REQUIREMENTS:

General Requirements:

1.1 The hybrid system should combine laser-based metal additive manufacturing and traditional CNC subtractive machining capabilities in single machine tool.

1.2 The system must provide the ability to build a metal component from a CAD model; add features or surface coatings onto an existing component; and repair an existing component.

1.3 The system must provide powder feeders that are capable of feeding a wide variety commercially available of powders at rates as low as 1 gpm.

1.4 The hybrid system must incorporate Argon based atmosphere control that provides an inert internal atmosphere with Oxygen levels < 40ppm.

1.5 The hybrid system must provide a solid-state 1000W laser with high beam quality, no maintenance, high efficiency, and full control and integration with the system.

## Hybrid System Additive Manufacturing Requirements:

3.1 Must include an integrated powder delivery system with up to four panel mounted powder feeders. Each powder feeder shall be individually controlled to allow gradient builds and custom blending of metal alloys.

3.2 Powder Feeder must provide steady powder flow at feed rates less than one (1) gram/minute.

3.3 Must include an integrated Print Head that includes focus optics and powder feed nozzle.

3.4 Print Head must have spot size adjustment for processing at lower and higher laser power.

3.5 Must provide an option for an integrated optical sensor that monitors the size of melt pool through the processing lens during the build and automatically adjusts laser power to maintain user-defined area.

## Hybrid System Safety Requirements:

4.1 A Class 1 Laser enclosure housing the hybrid milling, deposition and motion AGC

### FOB: DESTINATION FRT INCLUDED

Texas A&M University cannot accept collect freight shipments.

FAILURES TO DELIVER – If the vendor fails to deliver the supplies by the promised delivery date or a reasonable time thereafter, without giving acceptable reasons for delay, or if supplies are rejected for failure to meet specifications, the State reserves the right to purchase specified supplies elsewhere, and charge the increase in price and cost of handling, if any, to the vendor. No substitutions or cancellations permitted without prior approval of the Texas A&M Department of Procurement Services.

The State of Texas is exempt from all Federal Excise Taxes.

STATE AND CITY SALES TAX EXEMPTION CERTIFICATE: The undersigned claims an exemption from taxes under Chapter 35, Title 12A, Revised Civil Statutes of Texas, for purchase of tangible personal property described in this numbered order, purchased from contractor and/or shipper listed above, as this property is being secured for the exclusive use of the State of Texas.

### Terms:

IN ACCORDANCE WITH YOUR BID, SUPPLIES/EQUIPMENT MUST BE PLACED IN THE DEPARTMENT RECEIVING ROOM BY:

This Order is not valid unless signed by the Purchasing Agent.

**ITEM**

**DESCRIPTION**

components must be provided.

4.2 A laser safety window for viewing the process must be provided. The optical density of the safety window must provide sufficient attenuation of the laser beam such that the nominal hazard zone, as described by IEC EN 60825-1:1994, is contained within the enclosure.

4.3 A front access door must be provided that includes gloves to access and manipulate parts and tooling inside the enclosure while it is under atmosphere.

4.4 The access doors and ports must be interlocked to prevent possible exposure to the high power laser beam during normal operations.

**Installation Requirements:**

5.1 The Hybrid CNC machine must have overall outer dimensions such that it can transported through a doorway opening that is 82.75” High and 71.75” Wide.
